

A high quality glassfibre sports car based on Triumph Spitfire or GT6 components.

"The Hurricane is a totally engineered kit which gives the DIY motorist features which are unmatched by other kit cars...The GRP construction of the bodyshell and panels has been well conceived and carried out to the extent that in most respects a car completed to average standards looks and feels like a "real" car...This is undoubtedly a kit car conversion which matches, and often exceeds the structural properties of the original car..."

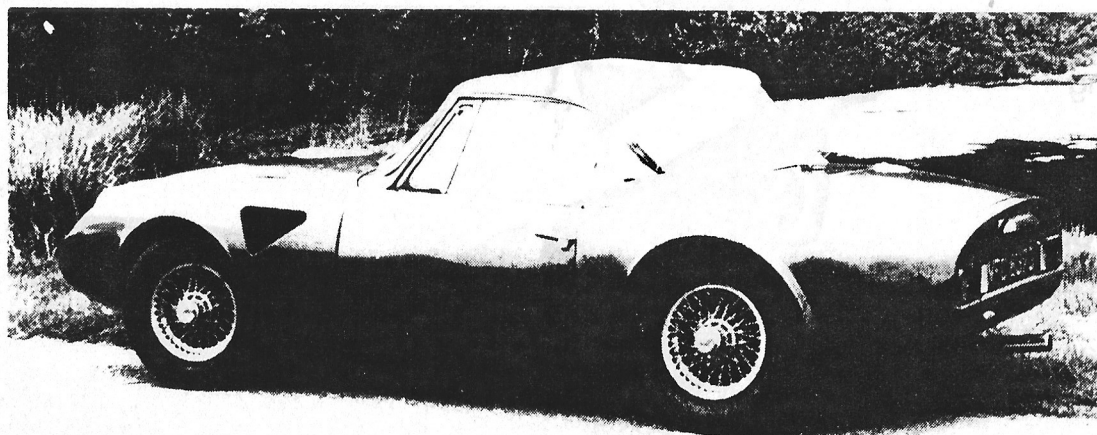

Sports Car and Kit Car Builder

"All opening panels fit their apertures extremely well, and I was particularly impressed by the solidity of the front end...One can immediately appreciate the value of using the door hardware and window winding gear from the base Spitfire or GT6. Once again this provides the car with a most civilised feel, enhanced even further by the Triumph hood."

Sports Car Mechanics

"The Hurricane demonstration model looked superb. The doors, bonnet and boot lid fitted very well, and on the road there was not a trace of rattles, creaks or looseness in the whole car; it was really very impressive."

Kit Car

Hurricane

Styled along the lines of those classic sports cars of the fifties and sixties, the Hurricane offers an exciting alternative that's fun to drive and cheap to run.

The tough, non-rusting GRP body is hand laminated using only the finest quality materials, and it's built to last. It's easy to see why we are fast establishing a reputation for quality and value.

The Hurricane is one of the simplest kit cars to build as it is essentially a body replacement for the Triumph Spitfire or GT6. Using the Spitfire folding hood and wind-down windows, and with the option of a hard-top, the Hurricane is a truly practical fun car.

With it's classic style and character, it's robust construction and well thought-out design, we believe that the Hurricane is simply the best Triumph based component car available.
